The Most Incredible Presentation About Programming Languages You Will Ever See

• • •

Brought you by the Building Relationships Online foundation

The Problem

- Peter Thiel believes that not enough millennials learn how to program

- Existing programming languages are too boring for the millennial attention span

- Lots of millennials want to learn programming but find it difficult to start

Millenials: Who Are They?

- What do they like?
- What do they eat?
  - Food? Rocks?
- ???
  - ????????
- Do they know what love is?
- Do they come in peace?

What is this? A weapon?

What We Created

- Clickb8 an esoteric programming language that will disrupt the tech world.

  - A parser that reads from our proprietary .cb8 source files

  - An evaluator that allows for loops, conditionals, arithmetic, logical operators and much more!

  - An external Scala DSL and utilizes Scala's pattern matching mechanism

  - Every statement is a irresistable clickbait headline

What Clickb8 Can Do

Everything*! It's Turing complete.

*that is computable

Demos

1. Hello World!

2. Factorial

3. Is Palindrome?

Any Questions?
